

Interested in saving money?

Reducing energy use?

Taking action and seeing real results?

Try Pepco Business Energy Manager- a secure, online tool that helps you better understand how your company uses energy.

Knowing when and where your company is using the most energy, you can find ways to reduce use and overall costs.

To sign up, have your Pepco account number and business ZIP code ready.

Once you're logged in, you can view the dashboard for insights from your last bill period.

See how your average daily cost, usage, and outdoor temperature compare to last year.

You can also see how your energy performance compares to similar businesses which you can explore further in the analysis tab.

See how well you power down during closed hours or manage energy during hot weather compared to similar businesses.

If you have multiple business locations, benchmarking tools in the account ranking tab will compare energy use between locations.

Dig even deeper into each account with energy reports that visualize trends over time, high-usage periods, and energy consumption by end-use.

On the business profile page, answer business related questions to customize your usage breakdown and generate energy saving opportunities tailored to your specific business needs.

Energy saving opportunities can be found on the solutions page. Here you will find information about incentive programs and no-cost best practices.

For example, if you click on the Lighting Section you'll see a list of solutions along with potential savings estimates with each project.

Start managing your energy today by taking advantage of Pepco Business Energy Manager.
